

Got swirl?

Enamel Pro® Propy Paste

The *only* propy paste with ACP technology
for 31% more fluoride uptake¹

Enamel Pro is different. Premier's innovative remineralization propy paste is uniquely formulated to deliver ACP (amorphous calcium phosphate). Why does this matter? Because increased fluoride uptake is critical to strengthening tooth enamel and reversing the demineralization process.

Plus, Enamel Pro propy paste provides an intense polish and shine. Your patients will love their lustrous, whiter, brighter teeth.^{2,3} And the colorful swirl cups and great tasting flavors will keep them smiling. Every time.
