**new! AeroPro™**
The New Standard in Cordless Prophy Systems

Now there's finally a light-weight, ergonomic, cordless and pedal-less handpiece that gives you the mobility you want, the choice of prophy angles you like, and the control you need.

Based on extensive input from dental professionals, AeroPro's innovative design helps reduce hand fatigue by allowing you to rotate the angle 360° for improved intraoral access and comfort. Its quick-touch button enables fingertip control for easy switching between low and high speeds. Its quiet yet powerful motor maintains a consistent speed during polishing – no extra pressure required. ChargeSMART™ Battery Technology gives you long-lasting power to get through the workday. And yes, AeroPro™ is CDC-compliant with a convenient infection prevention protocol. Best of all, your patients get a great polish. Every time.

Accepts most disposable angles
Can be rotated 360°

Quick-touch button
Easily controls speeds

Dimpled silicone grip
Improves tactile feel while preventing slippage

Quiet and powerful German-made motor
Constant speed without extra pressure

ChargeSMART™ Battery Technology
Charges quickly and provides lasting power for all day use
Mobility
✓ Total mobility with no cord drag or rheostat
✓ ChargeSMART™ Battery Technology gets you through the day

Choice
✓ Works with Premier 2pro® and most disposable prophy angles
✓ Quick-touch button to easily switch between speeds

Control
✓ Ergonomic, lightweight, well-balanced design
✓ Rotatable prophy angle for 360° intraoral access and comfort
✓ Compliant to CDC infection prevention guidelines

5500510  AeroPro™ Complete Package
(3) Autoclavable Outer Sheaths,
(288) 2pro® Disposable Prophy Angles (Short/Soft),
1 each: Motor Component, Charging Station,

AeroPro Complete Package Shown
Bioactive Release - Remin - Recharge

Maximize protection with award-winning BioCoat® Bioactive Resin Pit and Fissure Sealant. BioCoat with SmartCap™ Technology maintains the strength and durability of a heavily filled resin sealant, while providing the benefits of extended fluoride release.

BioCoat® is the only resin sealant with bioavailable ions

SmartCap Technology utilizes patented semi-permeable resin microcapsules filled with ionic solutions of fluoride, calcium and phosphate. The bioactive ions diffuse in and out of the sealant for long term release.

- Greater fluoride uptake in the presence of calcium and phosphate ions strengthens enamel.
- Calcium, phosphate and fluoride ions strengthen tooth enamel and protect against acid attacks.
- Exceptional retention seals margins against microleakage.

**SmartCaps are rechargeable**

SmartCap microcapsules have the ability to recharge from free ions of fluoride, calcium and phosphate found in saliva through concentration gradient dynamics.

---

---

Even after 6 months, fluoride, calcium and phosphate ion release continues at a significant rate.

---

Greater fluoride uptake for long-term protection
Outstanding barrier protection

BioCoat® is a 56% filled resin sealant providing excellent long-term resistance to wear with a compressive strength comparable to flowable composites. The resin formula is very resistant to oral solubility - a problem glass ionomer and resin-reinforced glass ionomers sealants cannot overcome.

Heavily Filled & High Compressive Strength
- Excellent retention and durable: resists cracking, chipping and fractures
- Lowers polymerization shrinkage and gap formation
- Maintains a smooth surface to avoid accumulation of plaque and debris

Excellent Flowability
- Penetrates and adapts into the smallest pits and fissures for a secure seal
- Highly retentive (Shear bond strength of 32 MPa)
- Bubble-free application

BioCoat’s impressive shear bond strength of 32MPa ensures BioCoat’s retention over the years.

BioCoat is not formulated with Bisphenol A (BPA).

3001530 BioCoat Standard Pack
Contains: One 1.2ml syringe and five disposable applicator tips
Shade: White

3001531 BioCoat Value Pack
Contains: Four 1.2ml syringes and 20 disposable applicator tips

3001532 BioCoat Bulk Pack
Contains: Twenty 1.2ml syringes

In BioCoat, the rechargeable SmartCap microcapsules are filled with ionic solutions of fluoride, calcium and phosphate. Tooth surfaces, both in contact and adjacent to the sealant, benefit from the extended release of these ions. The demineralization cycle is disrupted and the remineralization is supported. The exchange of ions and recharge of microcapsules extends maximum protection without putting the sealant’s physical integrity at risk.

Visit www.premusa.com/biocoat for more information.

SmartCap Technology, developed in partnership with Creighton University, utilizes patented** semi-permeable resin microcapsules.

Enamelon®
Preventive Treatment Gel

Be the Hero!
Here’s a great way to please your patients. Next time patients complain of sensitivity or symptoms from dry mouth, come to the rescue with Premier’s Enamelon. Enamelon Preventive Treatment Gel stops sensitivity in its tracks through its patented combination of stannous fluoride and ACP technology. Provides 3x greater protection against acid challenges than the 5000ppm F pastes to help prevent caries. Also reduces symptoms of dry mouth tissues through it’s proprietary long-lasting coating that soothes and lubricates.

Enamelon is your professionally dispensed solution to give your patients the relief they want and the enamel protection they need. Every time.

Treats sensitivity
Occludes tubules with ACP & Fluoride
Dentinal hypersensitivity is under-reported by the patient. Enamelon Treatment Gel is your professionally dispensed solution.

Enamelon® contains stannous fluoride along with calcium and phosphate ions that have proven effective for tubule occlusion. By blocking the exposed tubules with a combination of stannous (tin) ions along with fluoride, calcium and phosphate salts, a physical barrier is created that covers open dentinal tubules to prevent external stimuli from causing pain or discomfort.

Soothes dry mouth tissue
Enamelon provides an immediate and long-lasting soothing, moisturizing and lubricating effect.

Through the use of proprietary co-polymers, Ultramulsion® benefits your patients by providing a long-lasting coating that lubricates and soothes the soft tissues of the mouth.

Enamelon is the only stannous fluoride preventive treatment gel that has been shown in a clinical trial to help reduce many sensory symptoms of dry mouth.

All patients can benefit from Enamelon

More protection
Less fluoride⁶,⁹

Enamelon provides 3x greater reduction of enamel solubility⁶

- Reduces the solubility of enamel, preventing demineralization of the tooth surface when exposed to acids
- Decreases enamel solubility by 56.91% compared to 18.78% with 5000 ppm fluoride paste, providing 3x greater protection against acid challenges⁶
- Provides over 2x more beneficial fluoride uptake with only one-fifth the amount contained in 5000 ppm fluoride toothpastes⁹

Dispense with confidence!

Patients that have tried a sensitive toothpaste and have not had any relief, we offer the Enamelon Treatment Gel for the generalized sensitivity. For our dry mouth patients, we offer the Enamelon to help aid in the relief to dry mouth tissues, as well as protect them from caries.

- Dr. P., DMD & C. B., RDH, BS, Connecticut
Enamelon®
Fluoride Toothpaste
0.45% Stannous Fluoride (1150 ppm F)

Enamelon® Toothpaste contains the same clinically proven active ingredient optimized with calcium and phosphate ions as the preventive treatment gel, but in an 1150 ppm F formulation with a low abrasive for everyday use.

• Aids in the prevention of cavities
• Builds increasing protection against painful sensitivity of the teeth to cold, heat, acids, sweets or contact
• Helps to prevent gingivitis
• Helps to interfere with the harmful effects of plaque associated with gingivitis
• Delivers more fluoride uptake to the teeth\textsuperscript{9,22}
• Strengthens teeth better than the 5000 ppm F toothpastes\textsuperscript{9}
• Promotes remineralization and inhibits demineralization
• Soothes and moisturizes discomfort associated with dry mouth tissues
• Low-abrasive toothpaste (RDA of 39)
• Contains no SLS, gluten or dyes

Science Defined
Amorphous Calcium Phosphate (ACP) -
Building blocks of tooth mineral\textsuperscript{13,14,15,16}

The most reactive and soluble calcium phosphate compound, ACP forms on the tooth enamel, within the dentinal tubules and provides a calcium and phosphate reservoir. Research shows that available ACP on the enamel can prevent damaging erosion by stimulating remineralization of tooth structure\textsuperscript{17,18,19}. Introducing calcium and phosphate back into the surface of the tooth with products containing ACP technology is an ideal strategy to reverse the demineralization process.

The ACP-forming ingredients also strengthen teeth by acting as an enhanced fluoride delivery system to deliver more fluoride than products without ACP\textsuperscript{20}. The patient has the benefit of fluoride uptake without greater exposure to higher fluoride concentrations or volumes. ACP combines with fluoride to desensitize dentin. Fluoride, along with ACP, occludes tubules by depositing tooth-like minerals to create a semi-permanent reduction in hydraulic conductance. This is a proven mechanism to reduce dentinal hypersensitivity.

Value of Fluoride Sources
Fluoride reacts with tooth mineral, forming either fluoridated apatite (firmly-bound) or calcium fluoride (loosely-bound).

Firmly-bound fluoride, incorporated onto the surface of the crystals of apatite, can reduce the solubility of tooth mineral and hence inhibit demineralization due to acids generated by plaque bacteria\textsuperscript{17}.

Loosely-bound (labile F) fluoride provides a relatively slow-release form of ionic fluoride to plaque and saliva\textsuperscript{18}. There has been renewed interest in loosely-bound fluoride as a reaction product of fluoridation to act as a potential “reservoir” source of solution fluoride enhancing remineralization and retarding demineralization processes\textsuperscript{19}.

Enamel Pro®
Prophy Paste

The only prophy paste with ACP technology for 31% more fluoride uptake

Enamel Pro is different. Premier’s innovative remineralization prophy paste is uniquely formulated to deliver ACP (amorphous calcium phosphate). Why does that matter? Because increased fluoride uptake is critical to strengthening tooth enamel and reversing the demineralization process. Plus, Enamel Pro prophy paste provides an intense polish and shine. Your patients will love their lustrous whiter, brighter teeth.16,21 And the colorful swirl cups and great tasting newest flavors – ChocHazelnut and Mixed Berry – will keep them smiling. Every time.

Enamel Pro® Varnish
5% Sodium Fluoride Varnish

Varnish Best Practice for Your Practice
All varnishes are not equally effective! Enamel Pro Varnish is the first advanced fluoride varnish optimized to provide beneficial tooth-building ions of calcium and phosphate. Uniquely designed to create substantive forms of CaF$_2$ and ACP, Enamel Pro Varnish is ideal for reducing dentinal hypersensitivity and post-operative sensitivity. In fact, independent studies show Enamel Pro Varnish delivers more enamel fluoride uptake and greater fluoride release than 3M™ Vanish™.17, 25 And unlike other varnish, Enamel Pro Varnish is proven to diminish hydraulic conductance by 73%.24 Every time.

Indications for Use
Enamel Pro® Varnish is a fluoride containing preparation for the treatment of dentinal hypersensitivity, and for the reduction of post-operative sensitivity.

2pro®
Total Access Disposable Prophy Angle

Award-winning 2pro is the versatile 2-in-1 disposable prophy angle that helps you easily access hard-to-reach areas of the mouth quickly. One cup. One tip. No extra cost or time to switch. Which means a better cleaning experience, happier patients and less chair time! 2pro is your all in one polishing angle. Every time.

- Patented gearless, jam-free design - quiet, smooth polishing
- Angled neck for easier total access - makes hard-to-clean areas a breeze
- Advanced 2-in-1 design - saves time, improves workflow
- Convenient access tip – efficiently cleans around ortho bracket

Get Total Access!
2pro cleans and polishes all tooth surfaces with its unique cup and tip design!
No added expense for tips or brushes!
Use the cup to polish all tooth surfaces. Use the tip for gingival and proximal areas, occlusal surfaces, veneer margins, around implants and orthodontic brackets.

Facial surfaces
Veneer margins
Orthodontic brackets
Gingival/proximal

“ I absolutely love the Premier® 2pro® total access soft disposable prophy angle. The cup shape reduces splatter and is easy to use. Being able to remove the cup and use the rubber point is great. This allows access around the orthodontic brackets and wires. ”
- Sandra B., RDH, Pennsylvania
Perfecta® REV!® 14% Hydrogen Peroxide

Only 15 minutes, once a day!
The ideal combination for compliance - short weartime and less sensitivity.

Gel – Powerful whitening Gel
- 14% Hydrogen Peroxide – 55% higher concentration than the competition
- 15-minute daily wear time – Half the time of other brands
- Patented Water based gel that hydrates teeth as it whiten resulting in 66% less sensitivity than the leading strips.

Rinse – Refreshing Finishing Rinse
- Provides added boost to final whitening effect by activating any residual hydrogen peroxide ions
- Formulated with vitamin C that promotes healthy gums after treatment
- Patients will love the clean & fresh cool mint feeling

Suggest a REV! Refresher for all your previous whitening patients. Get them back to your office and keep them smiling white.

4000142 REV! Six Patient Paks
Each Patient Pak is a complete 2-week treatment. Contains 2 - 3cc syringes with 4oz (118.3ml) REV! finishing rinse. You add trays and tray cases.

4000141 REV! Six Refresher Paks
Ideal for touch-ups. Contains 1 - 3cc syringe with 4oz (118.3ml) REV! finishing rinse. You add trays and tray cases.

Available individually through dealer.

Perfecta® Bravó® 9% Hydrogen Peroxide

Only 30 minutes, once a day!
Patented water-based formulation hydrates teeth as they whiten to avoid sensitivity.

4000092 Bravó Patient Pak
Complete 2-week patient treatment. Contains 4 - 3cc syringes.

4000094 Bravó 50 Pak
Contains 50 - 3cc syringes. You add trays and tray cases.

4000091 Bravó Touch-Up Pak
Contains 1 - 3cc syringe.

Not available in Canada.
Perfecta® Carbamide Peroxide

Perfecta 16%
Can remove a full range of stains including those resulting from tobacco, dark beverages and even tetracycline. Wear time can be adjusted for light stains and for those patients with a history of thermal sensitivity.

Perfecta 21%
Tetracycline stains, fluorosis. Dispense only to compliant patients with no history of thermal sensitivity.

Perfecta® carbamide peroxide gels are formulated with a predominantly glycol base for minimal dehydration and sensitivity.

Perfecta Patient Pak
Complete 2-week patient treatment. Contains 6 - 3cc syringes with dispensing tips, tray case, tray material, patient instructions, doctor’s instructions, and cosmetic patient pouch.

PremierAir™
Hygiene and Diagnostic Instruments

- Comfortable, balanced, ergonomic handle with non-slip grip means less pressure to maintain control and less hand fatigue
- Exceptionally light, rugged polymer handles and tested extensively to ensure a long working life
- Made to high standards by master craftsmen

Hygiene Instruments

- Precision tips made with 440A stainless steel and SmartSharp® Technology keep edges sharp and well defined

Probex and Explorers

- Probes are easy to read and resistant to wear
- Explorers have excellent tactile sensitivity and sharp points for easy detection of tooth texture and surface irregularities

Premier’s innovation in sharpening technology allows you to start sharp and work smart:

- Easily maintain sharpness – proprietary process ensures a well defined edge you can easily re-sharpen as needed
- Apply less pressure and use fewer strokes – achieve a glass-like tooth surface
- SmartSharp® available on Premier Scalers and Curettes – at no additional cost

Premier® Instrument Edge
Leading Competitor Edge
A sharp edge ensures a smooth, precise cut with less hand fatigue.
An irregular edge is less efficient and can lead to more hand fatigue.

Gracey 5/6
Medium shank for cuspids and molars

Gracey 7/8
Medium contra-angle shank for bicuspids and molars, buccal and lingual surfaces

Gracey 9/10
Long contra-angled for molars with more acute blade angle

Gracey 11/12
Triple angulation for easy access to buccal/mesial and lingual/mesial surfaces of premolars and molars

Gracey 13/14
Triple angulation for easy access to distal/posterior surfaces of premolars and molars

Gracey 11/14
For easy access to a facial or lingual sextant with a single instrument.

Gracey 12/13
For easy access to a facial or lingual sextant with a single instrument.

Gracey 15/16
Angled shank, designed to reach mesial surfaces of posterior teeth

Gracey 17/18
Highly angled shank for reaching distal surfaces of posterior teeth
After probing, InSite™ scalers provide added visual confirmation that you have reached the base of the pocket.

**Gracey Variations**

Pocket Scalers (PS) and Mini Pocket Scalers (MPS) have a slender and longer terminal shank to provide access into deeper pockets. MPS has the same slender tip design as PS, but with half the blade length. InSite PS and MPS have a depth gauge at 5mm through 10mm offering an excellent visual guide.

**Big Easy Ultralite** Pocket Scalers (PS) and Mini Pocket Scalers (MPS) do NOT feature the depth gauge found in InSite Scalers.

**Rigid** Gracey designs have a thicker shank than the original Graceys, but are overall slightly shorter for increased strength when removing heavy calculus.

new! Vac Attak™ GREEN
Safe, Effective and EPA-Compliant Evacuation System Cleaner

New Vac Attak™ GREEN is a high-performance evacuation system cleaner designed to comply with the EPA’s Clean Water Act. Using a combination of powerful enzymes with powerful surfactant chemistry that gets the job done, Vac Attak GREEN’s environmentally-friendly formula meets the ADA’s best management practices. With a neutral pH, its non-foaming and non-corrosive formula has no chlorine or oxidizing agents. Safe and gentle for every day use with all amalgam separators, this evacuation system cleaner is still Vac Attak-tough to clean your lines of bio-burden, prophy paste and fluoride gels.

- Powerful enzymatic, EPA-compliant cleaner
- Compatible with amalgam separators
  - pH neutral
  - No chlorine
  - No oxidizing agents
  - Non-foaming
  - Non-corrosive
- Up to 80 cleanings per jar
- Economical and easy-to-use powder
- Fresh citrus scent

9011105 Six, 800g jars with scoop dispenser
Brite Shield™
Instrument Cleaner and Protectant

- Static soak and ultrasonic cleaner
- Removes glass ionomer, carboxylate, zinc phosphate cements and bio-burden
- Unique passivation process coats instruments restricting ruts and corrosion
- Debrides clogged dental burs, removes alginate and stone from impression trays
- Economical and easy to use. One jar makes up to 34 gallons
- Environmentally friendly

9011100   Six, 800g jars with scoop dispenser

Vac Attak™
Evacuation System Cleaner

- Especially effective on prophy paste and fluoride gels
- Fast-acting
- Environmentally friendly
- Economical and easy to use
- Up to 100 cleanings per 800g jar

9011101   Six, 800g jars with scoop dispenser

Vacu Blast™
Liquid Evacuation System Cleaner

Powerful enzymatic evacuation system cleaner that complies with EPA/ADA’s Best Management Practices and is specifically formulated to be compatible with all amalgam separators.

- Neutral pH
- Phosphate and chlorine-free
- Anti-corrosive
- Non-foaming
- Refreshing eucalyptus scent
- Environmentally friendly

Use daily to keep your system operating at peak performance!

9011107   Case of 12 Bottles, 32 fluid oz (946ml)
Each bottle yields 64 treatments
32 oz bottle available individually through your dealer.

Pro Clean™
Professional Strength Tartar and Stain Remover for Dentures, Partial, Retainers and Night Guards

- Extremely effective cleaner
- Environmentally friendly
- Easy to mix and use during patient’s prophy or dispense for patient home use

9011103   Box of 25 packets
9011102   Case of 10 boxes - (25 packets/box)

Removalon®-I
Removes Set Cements

- Effectively removes cements
- Convenient and easy to store
- Concentrated powder dissolves quickly
- Good for two months after mixing
- Environmentally friendly and biodegradable

9011005   Removalon-I Dry Pak
(6 expandable bottles - each fills up to 1/2 gallon - 1.9L)
**Topicale® Gel Jar**
- 18% benzocaine formulation
- Use on areas of injection and/or prior to scaling and curettage to alleviate patient discomfort
- Tropical fruit flavored
- 25% more material than 1oz jars

9007161   Gel - 35g / 1.25oz jar

---

**Topicale® Xtra**
**Oral Anesthetic Gel**
- Three fun flavors, with no bitter after-taste
- 20% Benzocaine formulation for rapid 10-second onset of surface anesthesia of soft tissue
- Economical 1oz jar (28.35g)

9007152   Very Berry Cherry
9007153   Mint Freeze
9007154   Jammin' Strawberry
9007155   Assorted package of 3

---

**Topicale® GelPatch™**
Once placed in the mouth, Topicale GelPatch dissolves gradually - releasing benzocaine to anesthetize surface tissue for up to 20 minutes. Ideal for denture sores, prior to injection and oral ulcer/irritations - appropriate for patient home use.
- Fast acting
- Self-dissolving
- Flexible

9007149   GelPatch - (25) Mint

---

**Topicale® Ointment**
Unique water-soluble base releases active ingredients on contact; permits onset of anesthesia in less than 20 seconds! Provides deeper surface anesthesia.
- Orange-raspberry flavor
- 18% benzocaine formulation

9007151   Ointment - 35g jar

---

**Topicale and Topicale Xtra are Gluten-free. Not available in Canada.**
