A century of trust

Slix™ Composite Manipulation Instruments - See page 1
TSZtech™ Diamonds - See page 13
Slix™ Composite Manipulation Instruments

Nonstick - Durable – Ergonomic - Autoclavable

The tips are treated with a revolutionary protective coating that provides superior nonstick properties and a lustrous surface for long lasting esthetic appearance. No more composite sticking; dentists appreciate the easy placement and fast clean-up! The ergonomic handles are manufactured from an advance technology polymer with medical-grade silicone grips. “Surprisingly light”—only 16g - on the largest available handle (1/2” (12.7 cm) diameter) to reduce hand fatigue.
New innovative coating provides long-lasting tack-free composite manipulation!
Composite Instruments

The CCI and CMI are double coated with anodize aluminum and PTFE to provide exceptional lubricity to virtually eliminate composite sticking. The PTFE coating also offers greater protection against harsh cleaning solutions. The black coating does not abrade to discolor the restoration. Safely autoclavable.

Composite Contact Instruments (CCI)

Establish Positive Contacts As You Light-Cure

CCI Technique Tip

After placing composite into box, insert instrument tip into the composite, torque into position and apply gentle pressure to adjacent tooth for desired positive contact. Light-cure composite, making sure composite is not overfilled to lock in instrument.

*As recommended by Dr. Brian Wilk.*

Cleaning/Sterilizing Tips

- Do not mix unlike metals in the same bag
- Simply wipe off CMI - do not expose to solutions with pH above 8 or containing iodophors.
Composite Manipulation Instruments (CMI)*

Easy Placement of Composite into All Areas Without Sticking or Discoloration

CMI Technique Tip

Acorn Carver (21B) is helpful in establishing anatomical contours, prior to carving.

Tip diameter measurements in millimeters.  
Neos Composite Instruments
For Carrying, Condensing and Carving

Flexible White Plastic • Sterilizable to 285°F (140°C)

Neos 425-1 • 9061306
Neos 425-2 • 9061308
Neos 425-3 • 9061310
Neos 425-4 • 9061312
Neos 425-5 • 9061314

Anterior - (Set of 5) • 9061301
Interproximal Carvers
For Proximal Restorations
Thin, flexible blades allow for easy placement and shaping.

IPC Carver Technique Tip
Dip in bonding agent to avoid composite sticking.

Universal Carriers are unique placement instruments with a sleek design. They enable the operator to transport and place amalgam while minimizing finger fatigue.
Sterilizable up to 134°C (273°F).

Amalgam Guns
Easily Place Restoratives

Tip diameter measurements in millimeters.
Cure-Thru® Clear Cervical Matrices

- Flexes to the exact contour of the tooth for dense restorations with excellent marginal integrity
- Compress restorative material as you light-cure
- Helps eliminate air inhibited layer
- Reduces time to final polish

9061011 Assorted box of 275 Contains: 50 Anterior/Premolar and Molar/Universal, 35 all other shapes, positioning instrument, gingival retraction instrument

Available in boxes of 150:
- 9061012 719CT
- 9061013 720CT
- 9061014 721CT
- 9061015 722CT
- 9061016 723CT
- 9061017 Anterior/Premolar
- 9061018 Molar/Universal
- 9061340 Positioning Instrument double-ended, autoclavable

Blue Cure-Thru® Matrix Bands

Transparent Contoured Matrices
0.075mm

- Blue color increases the contrast between the matrix and tooth without compromising polymerization of the composite
- Thin, yet strong enough to pack against
- Simplifies posterior composite placement

9061231 Premolar Bands (100)
9061233 Molar Bands (100)

Pre-contoured Metal Bands

0.035mm thickness

- Anatomical shape achieves better contact points
- Ideal for large Class II restorations with incremental curing technique
- Finished edges ensure patient comfort

9061070 Box of 30
Sycamore Wood Wedges
The Original Anatomically Carved

Anatomically Carved for Adaptation
Made of Sycamore wood, these wedges are slightly compressible, yet will not splinter even in thin sections.

Ultra-Thin is ½ the width of regular wedges, yet high through the embrasure.

- Round tip easily passes over gingiva
- Concave sides conform matrix band to tooth’s anatomy
- Square end is easily inserted and removed

Eight color-coded sizes (400 count)

Pre-soaking Sycamore Wedges in water or Hemodent just prior to use causes them to swell while in place creating greater wedge efficiency.

Number designates wedge length in mm (13=13mm)

Stop Strip
Anterior Bands with Integrated Stopper

Unique integrated stopper secures the matrix band between adjacent teeth.
Poli-Pro Disks™
Composite Polishing System

- Safe-Center - protects composite surface
- Faster - complete abrasive coverage of disk surface
- Thin and flexible - conforms to tooth anatomy
- Systematic finishing and polishing - single-use color-coded disks
- Two sizes - 1/2" for greater efficiency, 5/16" for control in gingival areas

**Safe-centered**
Faster than metal-centered disks!

All refill packs contain 40 disks.

- **1/2" Coarse (12mm)**
  - Refill #2019071
- **5/16" Coarse (8mm)**
  - Refill #2019072
- **1/2" Medium (12mm)**

**Fine**
- 30 microns (grit both sides)

**Extra-Fine**
- 9 microns (grit both sides)

**Intro Kit** contains:
- 80 disks, 4 mandrels.

**Starter Kit** contains:
- 35 disks, 1 mandrel.
Luminescence®
Single-Gel Diamond Polishing

Polish all surfaces in half the time!

Luminescence® is a patented, single-gel diamond polishing system. In less than two minutes, you can polish the surface of all restorative materials: composite, glass ionomer, compomer, amalgam, precious metal and enamel. Even porcelain achieves a lustrous surface in only minutes due to the optimal concentration of micron-sized diamond particles.

2014200  Luminescence Intro Kit contains:
3g syringe of Luminescence gel, 2 RA Mandrels, 50 applicators

2014202  Luminescence Gel (3g)

2014204  RA Mandrels (2)

2014206  Applicators (50)

“Optimum Polishing results on the CAD/CAM Vita Mark II ceramic.”

“Adjustment finishing with a Two Striper MF2 or MF3 alone, or as a final finishing stage after using a more coarse finishing diamond, followed by a 60-second polishing sequence with Luminescence diamond gel, was an effective procedure for optimum polishing results on the CAD-CAM Vita Mark II ceramic.”

Luminescence® Plus!
Diamond Polishing Paste for Patient Comfort + All-Surface Esthetics

- All-Surface Polishing - composite + porcelain + enamel + glass ionomer + precious metals + amalgam
- Single-Grit/Single-Step Paste - saves chair-time
- Increase Patient Comfort - contains potassium nitrate topical desensitizer
- Convenient - screw-tube dispenser + improved viscosity eliminates waste

2014208  Luminescence Plus ™ Gel (3g)
(Not available in Canada)

Compo-Strip®
Hand-held Autoclavable Stainless Steel Diamond Finishing Instruments

Compo-Strip® diamond discs are thin, flexible, one-sided diamond abrasive strips available in two widths and three grits. They have an uncoated safe center for easy access through the contact point and are ideal for finishing Class III, IV and veneer restorations.

1/2” Uncoated Safe-center!

Compo-Strip 200T2
For Orthodontic Reproximation
Simultaneously strip away enamel from adjacent proximal surfaces. Flexible, Double-sided with Safe Center
Length: 15.25mm  •  Width: 4mm  •  Grit: 60µ

Compo-Disc®
Hand-Held Autoclavable Diamond Finishing Instruments
For extremely tight contacts, use a Compo-Disc® to gain access. Safe-sided, edge and face-cutting.

Top performing diamond to adjust, remove or access all-ceramic restorations!

**TSZTECH™**
The P.B.S.® Brazed Advantage
Faster, Cooler Cutting & Longer Lasting!

Highest rated all-ceramic cutting especially effective on today’s new generation of tougher ceramic materials. Those materials include but are not limited to IPS e.max®, BruxZir®, Lava™ Plus, Cercon®, Zirlux® FC, IPS Empress, Procera® and Lava™ Ultimate.

Diamond Twist SCL™
Extra-Oral Polishing Kit

Glaze-like, multi-surface polishing - featuring advance open-weave fibra pre-polishers and 100% wool paste applicators - for a super-charged mirror polish

- Pre-polish with Fibra Points (barrel, wheel or taper); open-weave design generates significantly less heat
- Final polish with Diamond Twist Super-Charged Polishing Paste applied with felt barrel, wheel or point for a glaze-like polish

Diamond Twist SCO™
Intra-Oral Polishing Kit

After permanent seating and adjustments, polish crowns, inlays, onlays and nano-hybrid composites intra-orally in one easy step using Diamond Twist Super-Charged Polishing Paste.

- Use the flat or taper polishing brushes (autoclavable) for posterior occlusal surfaces
- Use the Micro-cloth disks for polishing and final high-gloss buffing
- Twist syringe avoids cross-contamination and dispenses just the right amount
