

Got swirl?

## Enamel Pro® Propphy Paste

The *only* propphy paste with ACP technology  
for 31% more fluoride uptake

**Enamel Pro is different.** Premier's innovative remineralization propphy paste is uniquely formulated to deliver ACP (amorphous calcium phosphate). Why does this matter? Because increased fluoride uptake is critical to strengthening tooth enamel and reversing the demineralization process.

Plus, Enamel Pro propphy paste provides an intense polish and shine. Your patients will love their lustrous, whiter, brighter teeth.<sup>2,3</sup> And the colorful swirl cups and great tasting new flavors – ChocHazelnut and Mixed Berry – will keep them smiling. Every time.
